About Me

Hello! My name is Liviu. I graduated from Alecu Russo State University in Balti, I am passionate about programming, I have major knowledge in web application development in general front-end React but also a rich experience in back-end php/js, I have worked with API integrations and I have set BD for different needs, I am adaptable and energetic. I always want to learn new things.

In general, I'm a responsible person, I always do everything on time, I get the job done and I don't like to spend my time inefficiently.

	Experience	> 2 years

Professional Skills

HTML

React

PHP

Java

JavaScript

C# (Unity)

Android Studio

SQL

Personal Experience

- Full-Stack developer** at VenTechMedia

February, 2024 - Mart, 2025

Worked on Dashboard site for company where I implemented full back-end logic and a lot of front-end part.

 Junior Java Developer at Unifun

Sept, 2023 - Nov, 2023

I gained experience as a Java developer, participated in several projects, developed functionality in Java, supported and developed several projects, in which I learned new things and developed myself professionally.

Web Developer at Halley Soft

Oct, 2022 - Dec, 2022

I did my university internship at the Halley Soft branch, where I fixed the problems in the text editor web application made in Html + js.

Mobile App Dev from courses at USARB

Jan, 2023 - May, 2023

At the mobile application development course, I created an application analogous to Instagram where the user registers, logs in and uploads photos via firebase.

Web Calculator at Network Course from courses at USARB

Sep, 2022 - Dec, 2022

In the network architecture, administration and security course, I created a computer that allows the calculation of the data proposed by the teacher, facilitating the testing process and minimizing the percentage of mistakes that may appear during the data calculation.

Automatic testing of mobile applications from the year thesis and the bachelor's thesis at USARB

Sep, 2021 - May, 2023

Upon finishing the university studies for the bachelor's thesis, I performed the automatic testing of the MyBalti mobile application with the help of 3 different testing applications.

Portfolio

Android Dev / Mobile App / Login-Register

Android app with firebase

I made an android application with the help of Android Studio that allows logging, registering and uploading photos. Available in my github.

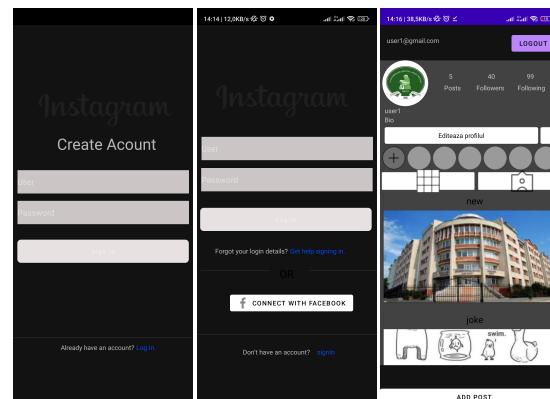

repository

Frontend / HTML / JavaScript

Web Calculator Network

I created a web calculator that solves the tasks proposed by a professor from UTM who teaches the networking course.

Web apps in Php Laravel

I made several web pages in PHP to demonstrate my personal skills. The first page shows the user's login and registration. The second page shows the user's feedback and previous comments. The last page is a crud method example with check input values and message about successful changes. [github link to Php projects](#).

Taxi Site

I created a website for making taxi reservations online. The site includes a form where users can choose the type of car. Reservation details are sent to a Telegram bot, allowing the owner to review the request and contact the customer. Additionally, there is an optional feature for users to send feedback about the service, as well as a gallery and a two-language option on the site

Education

University studies from USARB

2020 - 2023

In the university I started to study programming more deeply and to better understand the process of writing code, I accumulated the experience and skills necessary to be a good programmer.

College from CEITI

2016 - 2020

In college I got to know the basic information about coding and programming languages, general notions and I started to accumulate experience in creating programs.

Gymnasium from High School

2007 - 2016

I acquired general knowledge in high school as well as the desire to become a programmer.
